

Resume Analysis Report

Match Score: 15

Resume Keywords: Java, Spring Boot, REST API, developer, microservices, Docker

Job Keywords: frontEnd, Developer, React, HTML, react-redux

Missing Skills: React, HTML, react-redux, frontEnd development

Feedback: The resume focuses on backend technologies (Java, Spring Boot, microservices, Docker) while the job description is for a frontend developer with React, HTML, and react-redux skills. To improve your match, you need to demonstrate frontend experience or skills if you have any. If you don't have experience in these areas, consider acquiring these skills if you are interested in frontend development. A significantly different resume targeting backend roles is advisable in the meantime.

Strengths Summary: The candidate demonstrates experience in Java backend development, specifically with Spring Boot for creating REST APIs and building microservices. They also have experience with containerization using Docker. The resume highlights their expertise in backend technologies.

Match Summary: The resume has a low match with the job description due to its focus on backend development, while the job requires frontend expertise.
